Spot the Scam

5 Signs of a Phishing Email or Fake MFA Prompt

1. 

Urgent Pressure or Threats

"Locked in 1 hour" or "wire it today" is meant to rush you.

2. 

Lookalike Sender or Link

Hover first. Check the real domain letter by letter.

3. 
Unexpected MFA Prompts

Didn't just sign in? Deny it and report it.

4. 

Requests for Passwords or Codes

IT never asks for your password or a sign-in code.

5. 

Strange Attachments or Sign-In Pages

Surprise invoices or shared files, or a fake Microsoft 365 sign-in page.

When in Doubt, Pause and Verify

- **Don't click** unexpected links or attachments.
- **Don't approve** prompts you didn't start.
- **Call a known number,** never the one in the message.
- **Report it** to IT, even if you clicked.
